

MATH 473 DATA SCIENCE PRACTICUM - 3 credit hours

Course Description

In this project-oriented course, students will work and learn together to solve real-world data analysis problems. Students are encouraged to share their findings and insights. The course will be presented in a way that is accessible to students with varying levels of background knowledge.

Prerequisites:

COM 526 & CS 553 or MATH 651

Students will work in groups of 3 or 4 to solve data analysis problems. Knowledge of other industries is encouraged.
