M.S. in Rehabilitation and Mental Health Counseling

State Licensing Information Disclosure to Consumers

For more information on licensing requirements, including contact information for every state and territory licensing board, please see the Licensure & Certification – State Professional Counselor Licensure Boards page on the ACA webpage [\[link\]](#). It should be noted that different states have different names/categories for professional counselor designation. All states require the completion of supervised practicum and internship during a master’s degree program (although the number of required hours may vary). These aspects are also required for the master’s degree in rehabilitation and mental health counseling at Illinois Institute of Technology. In addition to education requirements for the master’s degree, however, most jurisdictions require post-master’s professional experience. These requirements are beyond the curricular requirements described below. Where indicated, the RMHC program at IIT meets the criteria for the entrance-level professional category within the counseling profession.

Below, an asterisk (*) indicates that earning a master’s degree from a program accredited by the Counsel on the Accreditation of Counseling and Related Professions (CACREP) satisfies educational requirements for licensure. IIT is currently accredited by CACREP.
